

16th Canadian Skills Competition May 20th - 23rd, 2010

Web Site Development #17 Project

Note: The content and/or requirements described in this document will be altered by approximately 30% for the actual competition.

Your task is to design a web site for a fictitious restaurant called **The Urban Grill**. The logo will be provided for you in the form of source files. Please follow the Logo use guidelines when using it on the web site.

Navigation

Links to these pages need to be included in a form of navigation, not necessarily in the main navigation menu; however on the pages.

1. Home
2. Menu
 - a. Starters
 - b. Appetizers
 - c. Dinner
3. About
 - a. Location
 - b. History
 - c. In the News
4. Contact
5. Login
 - a. Register
 - b. Retrieve Username/Password

Functionalities:

Content Management System:

- The administrator of the website will be able to edit the content on all pages with the exception of the contact form.
- The administrator will be able to edit the menu and add pages to the site.

Member Management System:

- Users can sign up and become members after the confirmation of their email address.
- Use Ajax to perform validation on the member sign-up form
- Members can write reviews on the individual menu items
- Members can rate the menu dishes and a visual graphic is displayed – ex: 5 stars appear and a calculated percentage are coloured depending on the rating of the members.

Additional Functionality

- The user will be able to toggle between French and English versions of the site
- The site will be searchable

Advertisement

- An advertisement is to be created showcasing a menu item and are located prominently on the Home and About pages.
- Ad is to be linked to the food Menu
- Concept of Ad :
 - Become a member today and write a review and or vote on a menu item.
