

Myles Robinson (Canada)
Home: Winnipeg, MB
Competition Area: Mobile Robotics

Myles Robinson is constantly on the go. He enjoys sports such as soccer, rugby and baseball and realized at a young age that he needs a career that will keep him moving and on his feet. It was important for him to choose the right career. With that in mind, he changed high schools to one with an applied-learning curriculum which helped Myles realize that he would excel in the world of trades.

In order to be successful in his career, Myles is very careful about selecting school courses, aiming for ones that will help him be successful in his chosen trade. At his new school, he learned about the Skills/Compétences Canada-Manitoba Competitions. Participating in both the Provincial and Canadian Skills Competition has proven to be an area of great success for Myles as he has qualified to join Team Canada at the 40th WorldSkills Competition in Calgary.

“By participating in this competition, I want to demonstrate my skills to the world, my family, and my friends.”

Myles recognizes the opportunity for advancement with the experience of the competitions on his resume, but he also looks forward to making new friends, and gaining new skills and knowledge at the WorldSkills Competition.

Currently working as a shipper, Myles is looking forward to attending post-secondary school and learning more about mobile robotics as a skilled trade. Myles is thankful that his parents and their friends have exposed him to the rewarding opportunities that different skilled trades have to offer. He is focused and determined to work hard on his skills to ensure that he makes a valuable contribution to the workforce as well as to his profession.
